PROFILE

Motivated professional with a background in technology consulting and software development, currently focused on developing a career in Product Management. I enjoy collaborating with clients to understand their needs and translating them into clear, actionable requirements for development teams.

While I have a solid technical foundation, my real interest lies in the strategic and business aspects of building products rather than coding. My experience as a semi-professional drummer has strengthened my communication, teamwork, and adaptability, qualities that help me manage stakeholder expectations and contribute to effective product delivery.

EDUCATION

Università degli studi di Urbino <i>Bachelor in Computer Science</i>	2023 <i>Urbino</i>
--	-----------------------

EXPERIENCE

IT Consultant	2023 - Today
----------------------	--------------

<i>Avvale S.p.A.</i>	<i>Milan</i>
----------------------	--------------

- Managed the ticketing workflow of multiple projects, ensuring timely resolution and alignment with business objectives.
- Led the end-to-end development of PowerApps/ PowerAutomate solutions for clients, from requirements gathering to project completion, with occasional maintenance responsibilities.
- Advised clients on the best technical solutions, with high adoption rates of my recommendations.
- Identified and implemented optimizations with my teammates to reduce the number of incoming tickets for a project, resulting in approximately a 10% reduction in the time spent on ticket resolution over a year.

Frontend Developer	2021 - 2022
---------------------------	-------------

<i>kint</i>	<i>Lugano</i>
-------------	---------------

- Developed custom websites using HTML, CSS, and JavaScript, working in a startup environment.
- Collaborated closely with the Founder and another developer, ensuring project goals were met.
- Took ownership of the frontend development, improving UX/UI for client websites.

Software Testing & Research Intern	2021
---	------

<i>Websolute S.p.A.</i>	<i>Pesaro</i>
-------------------------	---------------

- Conducted automated and end-to-end testing on company-developed websites.
- Authored a bachelor thesis on software testing methodologies, focusing on tools like Cypress and Postman.
